- tourist and cultural activities
- urban planning
- energy efficiency

European funds and grants

The Next Generation EU Funds are a great opportunity for Urban Public Services. PWACS and its team of professionals accompany our clients in this process, in a personal and close way.

With the arrival of the **Next Generation funds** and the challenge assumed by the Spanish Government in its ambitious Recovery, Transformation and Resilience Plan, a range of possibilities opens up for all the actors involved both in the management of these funds and in the achievement.

PWACS in its eagerness to increase the added value of its consulting services, it will offer its clients access to this new line of business via **PWACS Next**.

PWACS Next aims to accompany and advise our clients throughout the process of accessing **Next Generation European Funds** and other subsidies, through our services:

Strategic consulting

Proven methodology to grow our client's business with a strategic development approach. We identify their needs and advise them on the configuration of their strategic projects.

Call Observatory

We identify and select those calls at a European, national or regional level that are favourable to the interests of our clients, providing personalized quality information to our clients.

Management of Grant Files and EU Funds

Processing of files and in the cases of concession, justification and economic-administrative follow-up of them.

legal service

At PWACS we provide our clients with specialized Legal Advice in environmental law, covering all fields of law within the Water, Mining, Agro-industrial and Environment sectors and we advise on new challenges such as Anti-Fraud Plans.

PWACS and **Gutierrez Labrador Abogados** founded **PWACS-Gutierrez Labrador Legal**, which was incorporated into the Business Group to create the first national legal consulting firm in matters of water, environment, mines and Public Services, thanks to the extensive experience of both companies in these sectors.

Our professionals develop actions such as:

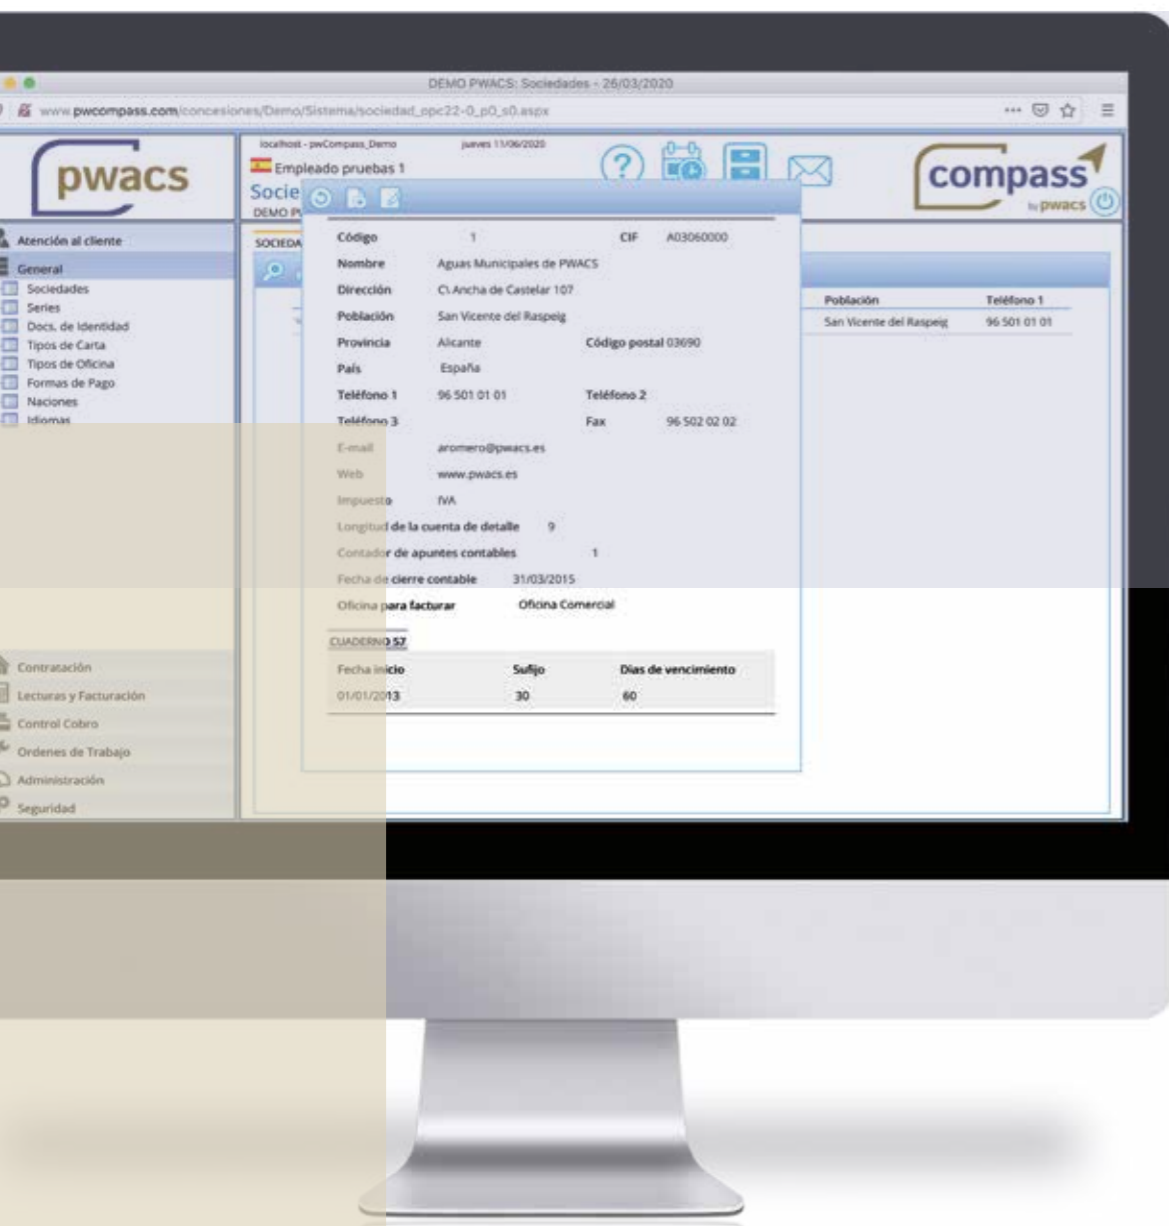

- Public Compliance and Anti-fraud Plans.**
- Preparation of **Specifications and legal opinions** in public contracting procedures.
- Processing of files before the different **Hydrographic Confederations, Ministries and Town Halls.**
- Intervention in **boards of directors.**
- Judicial proceedings.**
- Carrying out **studies and market strategies**, negotiations and business mediation.
- Carrying out **insurance audits** (agricultural, product or company).
- Management and defence of the implementation and use of **Trademarks and Intellectual Property.**

technological and communication solutions

At PWACS we put at the service of our clients the most advanced technological tools as well as the necessary communication support for the correct disclosure of the management of Public Services.

IT services

We have applications developed for the improvement and more efficient management of Urban Public Services, such as:

COMPASS is a multi-module solution for the Integral Management of the Commercial Water Cycle, created by a team of professionals in the sector, responding to the needs of the different agents: Public Administrations, operators, technicians ...)

Smart Green Control is an application developed for the Quality Control of Public Services based on the socialization of data to inform citizens.

This tool facilitates transparency by allowing access to information in a simple, clear and real-time way through dashboards. Likewise, it improves the quality of Urban Public Services through the implementation of Control Indicators.

communication services

PWACS Comm provides municipalities with a local communication service that values the management of Urban Public Services, within an environment of Transparency.

To properly transmit the **environmental and socioeconomic benefits** of proper management of Urban Public Services to the whole municipality. **PWACS Comm** provides **Communication Plans** and the necessary tools to municipalities and local corporations. Likewise, it complies with the **requirements of the Recovery, Transformation and Resilience Plan and the 2030 Agenda**.

PWACS Comm provides within the Plan:

Communication tools for Citizens, both conventional (posters, information brochures, etc.) and digital (optimization of the municipal website, publications on Social Networks).

Tools for the Media. A complete press kit: Press Dossier, Press Releases, Photographic Archive and Audiovisual Archive.

engineering

With a history of more than 30 years, Sedinta joins the group of companies owned by PWACS, providing a company specializing in the design, development of detailed engineering, manufacturing and assembly of installations for the Environment and, specifically, in the Water sector.

Our services include actions such as:

- Development of Basic Engineering.
- Development of Detail Engineering.
- Pilot plants.
- Supply of Units Turnkey package.
- Design of Hydrocarbonated Water Treatment Plants.
- Individual equipment for Water Treatment Stations.
- Industrial filtration installations.
- Lateral filtration installations.
- Strainers
- Pumping installations.
- Compact urban water treatment facilities (small towns, associations, urbanizations)

monitoring and control

PWACS Services provides our clients with the necessary Control and Monitoring in the provision of Urban Public Services, with the aim of improving their quality.

PWACS Services provides municipalities with field work teams to assess, among other things, the quality of services such as:

-  **Waste Collection (RSU)**
-  **Street cleaning**
-  **Maintenance of parks and gardens**
-  **Water**
-  **Building Cleaning**
-  **Mobility and Parking**
-  **Sports facilities**

Pwacs Services performs the tasks of:

- Field monitoring
- Definition of Quality Indicators and dashboards
- Comparative Controls
- Improvement proposals

corporate

Thanks to its sectoral approach, PWACS Corporate Finance can work alongside its clients in achieving their objectives beyond the execution of the transaction, becoming involved in their growth in the medium and long term.

- Water
- Environment
- Energy
- Infrastructures
- Services to Public and Private Infrastructures

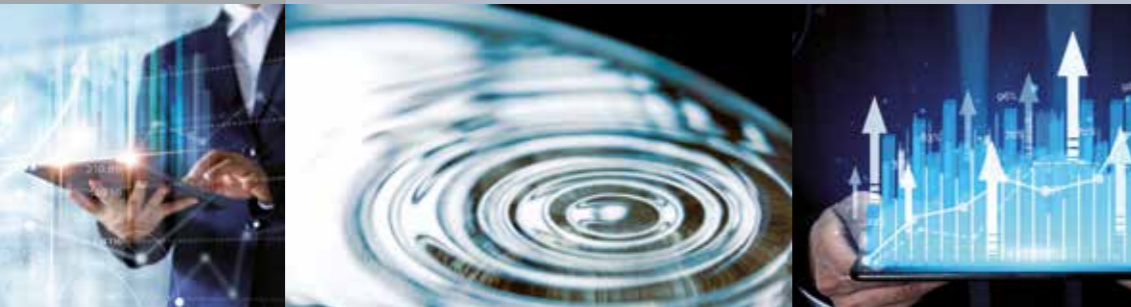

Advice to Administrations, Institutions and public and private companies in their Corporate Finance processes:

- Technical and Environmental Due Diligences
- Valuations of companies and Ecofin models
- Sectoral and regulatory reports
- Advice on buying and selling assets

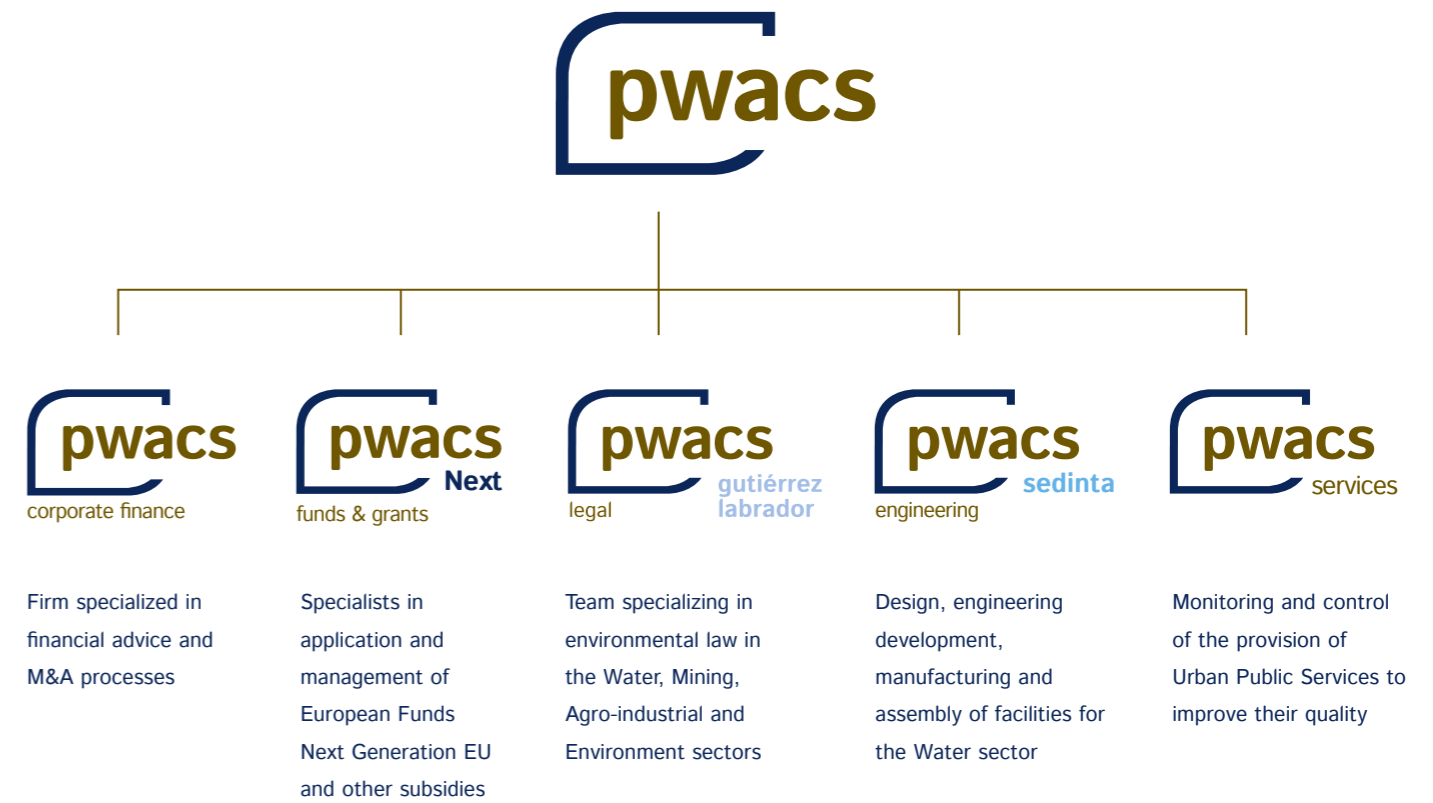

And any other corporate operation that is necessary for the development of the strategy of our clients.

organization and structure

PWACS is structured as an organization of specialist companies in each specific business area linked to the strategic sectors of the group:

PW Advisory & Capital Services GROUP

commitment

PWACS is a company committed to the environment, social welfare and the development of people and communities. For this reason, it actively participates in various projects and initiatives that promote a real improvement in our environment.
